

Product description

The P4 cabinet is suitable for outdoor installation and installation of various components such as solenoid valve assemblies, compressors, control devices for water treatment plants, pumping stations and other products.

The cabinets are made from a monolithic piece of polyethylene and provide waterproofing and prevent sound from spreading outside the cabinet.

An easily removable cover is installed on the cabinet, which allows it to be locked.

Technical data

Cabinet volume	48 [L]
Dimensions L x D x H [mm]	1340 x 450 x 240 [mm]
Material	Polyethylene [PE]
UV material stability	Yes

ADDITIONAL INFORMATION

Installation

When installing the tanks, there is the possibility of installing additional equipment such as: manholes for gutters, sand filters, fine filters, additional risers, level gauges and a movable cast iron cover. You can find more content about additional equipment on the website www.rototECO.eu
