

Product descriptions

The P5 cabinet is suitable for outdoor installation and installation of various components such as solenoid valve assemblies, compressors, control devices for water treatment plants, pumping stations and other products.

The cabinets are made from a monolithic piece of polyethylene and provide waterproofing and prevent sound from spreading outside the cabinet.

An easily removable cover is installed on the cabinet, which allows it to be locked.

Technical data

Cabinet volume	60 [L]
Dimensions L x D x H [mm]	510 x 350 x 1360 [mm]
Cover dimensions L x D x H [mm]	380 x 350 x 460 [mm]
Material	Polyethylene [PE]
UV material stability	Yes

DODATNE INFORMACIJE
